Design studio [Dsignio](http://www.dsignio.com) (<http://www.dsignio.com>) has come out with a new tile for [Harmony-Peronda](http://www.peronda.com/es) (<http://www.peronda.com/es>) that lets you play around with the design simply by rotating the tile. A variety of compositions can be created strictly from using the single, hexagonal tile, Roll, in different positions which leads to endless possibilities.

Orderly or more chaotic, the choice is yours and no matter what direction you go in, you'll have a graphic floor that stands out. The tile also comes in different colors letting you choose what works best for that environment.
