

SUPREMATIST SCULPTURAL SHELVING

BY TROY TURNER (<https://www.yankodesign.com/author/troy-turner/>) / 09/12/2014

DSIGNIO's Collage Collection is a system of shelving and cabinetry based on the Suprematist art movement (with a dash of Cubism and sprinkle of Neoplasticism!) that focuses on forceful and simple shapes over superfluous elements. The resulting aesthetic is an illusion of overlapping wood blocks, yet each modular layer is functional with its own cover and internal system of cubbies and shelves. Halfway between art and design, it's first an object of functionality and secondly a sculptural expression for contemplation.
